

## Zoo Crew Instructions

The game can be played with either 2 or 4 players on the floor or on a table. Each team has 3 bags to throw.

Each team takes 3 shots beginning with the team that scored the last point. All bean bags must be tossed underhand. Each player must stand behind the toss line when tossing a bean bag. If a player's foot crosses the toss line when tossing a bean bag, his/her points for that toss are not counted and turn is lost.

After the first player has finished throwing all three beanbag, count the number of animal targets knocked down. Each animal is worth 1 point. Add up how many points the first team earned and then reset the targets, allowing the second team to have a turn.

Once the second team is finished, tally up points. If there are only two players, compare the scores and the player with the highest point tally wins. With four players, allow the rounds to continue until all bean bags are thrown and tally all the points to determine the winner.
